TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, Swift
Frontend: React.js, React Native, Next.js, HTML, CSS, SwiftUI, Expo
Backend & Databases: Node.js, Firebase (Auth, Firestore, Storage), SQL, MongoDB
Tools & Platforms: Git, GitHub, Active Directory, PowerShell, Docker, Linux, Kali Linux, Visual Studio Code

EXPERIENCE

IT Help Desk Intern | JVIS USA / Mayco International, Shelby Township, MI | FEB 2026 – Present

- Resolve 30–40 support tickets per week across multiple Mayco subsidiaries using Web Help Desk, troubleshooting VPN connectivity, printer configuration, Outlook issues, and account access for a multi-company user base.
- Windows 10 to Windows 11 upgrade initiative, completing 10+ laptop upgrades per week by coordinating schedules with end users and ensuring security compliance across the organization.
- Manage employee lifecycle workflows in Active Directory using ADManager, including account provisioning, security group assignments, and access deactivation upon termination.

IT Service Desk Intern | OneStream Software, Birmingham, MI | JUN 2024 – AUG 2024

- Deployed and configured 50+ computers through a standardized imaging process, maintaining system consistency and reducing configuration-related support tickets across the organization.
- Configured access permissions for 30+ users across multiple Active Directory security groups, including elevated privilege accounts, enabling self-service operations and reducing recurring IT requests.

Judge | FIRST Robotics Competition, Detroit, MI | MAR 2024

- Conducted technical assessments of 20+ robotics teams, evaluating autonomous systems, mechanical design, engineering methodology, and code quality to determine award placement.
- Collaborated with a panel of industry judges to score and rank teams on technical excellence, innovation, and presentation quality.

PROJECTS

ShareAPlate | React Native, TypeScript, Firebase, Expo | *Senior Capstone, QA & Presentation Lead*

- Architected the Mutual Exchange feature end-to-end: real-time Firestore listeners (onSnapshot) for live feed updates, Haversine-formula distance filtering, multi-criteria search (allergens, dietary preferences, food categories), and zip-code geocoding to lat/lng coordinates.
- Built request/accept/decline workflow with real-time status management, messaging after exchange acceptance, and bookmark functionality, achieving sub-500ms screen transitions across 10+ screens.
- Authored 13,000+ lines of code across 31 documented files including custom React hooks, reusable UI components, and Firebase security rules ensuring Michigan Cottage Food Law compliance.

UniPay | Swift, SwiftUI, Firebase, MongoDB, Payment API

- Built iOS frontend using SwiftUI with NavigationStack architecture, implementing fund management, multi-currency conversion with real-time exchange rates, and secure card information display.
- Integrated payment API for currency conversion transactions supporting multiple currency pairs, with Firebase backend for user authentication and MongoDB for persistent data storage.

Book Showcase Website | React, HTML, CSS, JavaScript | Live Demo

- Developed responsive web application with interactive book browsing, click-to-view detail pages, and clean component-based architecture deployed on Netlify.
- Implemented dynamic rendering with React state management, responsive CSS layouts for mobile and desktop, and continuous deployment via Netlify integration with GitHub.

EDUCATION

Wayne State University | Detroit, MI | MAY 2021 – DEC 2025

Bachelor of Science in Computer Science | GPA: 3.50 | Dean's List: Fall 2024, Winter 2025

Relevant Coursework: Software Engineering, Algorithm Design & Analysis, Database Management, Operating Systems, Computer Architecture, Ethical Hacking, Game Programming & Design
